UNMANNED SYSTEMS UPDATE

07 Jun 10. G-NIUS' Guardian™ UGV system shown at Eurosatory. G-NIUS Unmanned Ground Systems Ltd., a jointly-owned company of Elbit Systems Ltd. and Israel Aerospace Industries Ltd., revealed that its AvantGuard® UGCV was recently delivered to the IDF. Based on the technological strength and capabilities of G-NIUS' Guardian™ UGV system, as well as building on the Tactical Amphibious Ground Support (TAGS) vehicle excellent maneuverability in harsh terrain environments, the AvantGuard® UGCV significantly expands the applications envelope to encompass Counter IED (CIED) and ground maneuvering combat missions. Employing a set of modular payloads such as: Ground Penetrating Radar, Counter IED Jammer, Mini-Pop cooled thermal surveillance camera, Counter Human & Vehicle Detection Radar and more, and based on its inherent endurance, AvantGuard® can be effectively deployed in a variety of combat missions including: Counter IED, Advance Guard, Armed Sentry, Combat Logistic Support, CASEVAC and more. It is controlled by a mobile or portable Operational Control Unit (OCU), and can also operate in a Follow-me mode, where it is autonomously trailing a
